1. European Public Health Conference

Malta 2012

The 5th ANNUAL EUROPEAN PUBLIC HEALTH CONFERENCE 2012, co-organised with the Maltese Association of Public Health Medicine, will be organised from 8 to 10 November 2012. The main theme of the conference is All Inclusive Public Health.

Abstract submission is now open until 1 May 2012 (midnight CET).

Malta 2012 website: http://eupha.org/site/upcoming_conference.php

Questions? Feel free to contact us at: conferences@eupha.org

2. EUPHA update

EUPHA launches a prize contest!

To celebrate the 20 years of EUPHA, we launched a prize contest in January. Every month, we will give a link to the website with a question on EUPHA. For each answer, you will receive a letter, which – if you have answered everything perfectly – will form a word. Send this word between 1 and 5 November to: office@eupha.org

From the correct entries, we will draw 4 winners. The prize to win is the Malta 2012 Conference dinner (free of charge) at the EUPHA president's table.

[Click here](#) for the second question!

New EUPHA snapshot

EUPHA is proud to present the newest EUPHA snapshot on The economic crisis and its impact on public health. EUPHA snapshots are based on abstracts presented at our conferences. The snapshots can be downloaded from http://www.eupha.org/site/publications.php?publications_page=2

European Journal of Public Health

A supplement on the Progress on tobacco control in Europe has just been published. If you are a EUPHA member, you can access the full text by logging on to the EUPHA database and then clicking on EJPH.

EUPHA facebook and twitter

Did you know that we are also on  [facebook](#) and twitter <https://twitter.com/#!/EUPHActs>
Join us!

EUPHA section on Urban public health:

We are pleased to announce that the EURO-URHIS 2 final conference will be on 12th-14th September. Please see www.urhis.eu for registration and abstract submission.

EUPHA is collaborating with the following conference:

Title: 4th Conference on Migrant and Ethnic Minority Health in Europe
Date: 21-23 June 2012
Place: Milan, Italy
More information: www.unibocconi.eu/mighealth2012

EUPHApedia – Building knowledge and capacity together

EUPHApedia

We are pleased to announce that EUPHApedia continues to grow. We have 2562 documents (increase of 33 from January) in the database.

Interesting articles now available in the EUPHApedia database:

27 February, 2012

[Health Policy Toolkit](#)

This publication of the World Bank offers online access to a regularly updated collection of information about policies and practices that can help enhance the contribution of the private sector to important health goals in developing countries.

17 February, 2012

[Marmot Review \(Fair Society Healthy Lives.\)](#)

Two years after the start of the "Marmot Review" an updated report on the monitoring of health inequalities and their social determinants in Europe has been published.

17 February, 2012

[Insights from past millennia into climatic impacts on human health and survival](#)

This publication by Tony McMichael gives an overview of historical experiences of climatic changes.

14 February, 2012

[Jubilee Conference FPH Pleven Bulgaria Abstracts Book](#)

The abstracts of the Jubilee Conference of the Faculty of Public Health in Pleven, Bulgaria have been included in **EUPHApedia** and are now searchable by keywords.

Please feel free to send your feedback to: office@eupha.org

3. Call for proposals, job opportunities

Regional Studies Association European Conference 2012: Call for papers

13th - 16th May 2012 - Delft University of Technology, Delft, Netherlands

Networked regions and cities in times of fragmentation: Developing smart, sustainable and inclusive places

Deadline for Abstract submission: 10th February 2012

Website: <http://bit.ly/zcU381>

Session Organiser: - Erio Ziglio, Head of the WHO European Office for Investment for Health and Development

".....Regions and cities are increasingly interdependent; economically, socially and environmentally. Patterns of interactions between regions are experiencing rapid changes as a result of dramatic shifts in production and consumption patterns, advances in communication technologies and the development of transport infrastructure.

These changes pose many challenges for the analysis and management of regions. They are also leading to new patterns of activities and relationships and new forms of clustering and networking between regions. At the same time, regions are becoming increasingly fragmented in many ways; economically, socially, environmentally and also politically.

The governance of regions faces multi-level, multi-actor and multi-sectoral challenges. New spatial interactions at new scales demand new approaches for consultation and coordination. More flexible ('softer') forms of governance are beginning to emerge which seek to work around traditional governmental arrangements. These new arrangements pose many as yet unresolved dilemmas concerning the transparency, accountability and legitimacy of decision-making.

The 2012 RSA conference in Delft provides a timely opportunity for participants to come together and reflect on the various strengths, weaknesses, challenges and opportunities of networked cities and regions within these different contexts of fragmentation.

Papers that consider these issues in relation to the development of smart, sustainable and inclusive places (the three dimensions of the Europe 2020 Strategy) are particularly encouraged. ..."

Call for innovative health technologies and eHealth solutions for low-resource settings

WHO World Health Organization - GOe - Global Observatory for eHealth

Website: <http://bit.ly/zPYjNS> PDF file: <http://bit.ly/zjOOfX>

Submission of Application Deadlines:

- Dateline for Innovative health technologies - 29 February 2012

- Dateline for eHealth solutions – 30 April 2012

“.....Medical devices and eHealth solutions have the potential to improve lives. However, too many people worldwide suffer because they don't have access to the appropriate health technologies. This call highlights the importance of these innovative technologies towards improved health outcomes and the quality of life.

WHO aims to raise awareness of the pressing need for appropriate design solutions. The Compendium series was initiated to encourage a dialogue between stakeholders and stimulate further development and technology dissemination.

The annual publication serves as a neutral platform to introduce health technologies and eHealth solutions that have the potential to improve health outcomes or to offer a solution to an unmet medical need. The Compendium series specifically focuses on showcasing innovative technologies that are not yet widely available in under-resourced regions.

It is designed to help developing countries becoming aware of appropriate health technologies and eHealth solutions in support of their environment....”

“...Entries must demonstrate the technology's suitability for use in low-resource settings. Technologies are then selected for inclusion in the Compendium if they fulfill at least one of the criteria below:

- The technology or the practice is better suited to **address a health problem or to improve current health systems and services** than existing solutions available. Examples of improvements over existing technologies may include superior effectiveness; enhanced ease of use and maintenance; reduced training requirements; labor saving; improved safety level for user, patient, and/or environment; increased social and cultural acceptability; technical superiority; improved accessibility, better cost-effectiveness and affordability; reduced energy requirements.

- The technology provides an **appropriate solution to a health problem** not yet addressed by any other technology...”

4. Interesting News

High Level Conference on EU Health Programmes

A High Level Conference on EU Health Programmes will be organised in Brussels on 3 May 2012 by the European Commission's Directorate-General for Health and Consumers and its Executive Agency. The results and success stories from the first and second Health Programmes will be presented. There will also be the opportunity to share views and build consensus for the future third programme which is currently under discussion at the Council and in the European Parliament.

EUPHA's Research Lead Mark McCarthy will speak in a plenary panel session at the event on behalf of the research community about priorities for a future health programme.

For more information: http://ec.europa.eu/health/programme/docs/ev_20120503_prog_en.pdf

Health impact assessment portal opened at CREIS

The new HIA portal in Spanish, the CREIS, Centro de Recursos de Evaluación de Impacto en Salud is already on line at <http://www.creis.es/>.

The CREIS provides key information and resources in Spanish, as well as links to relevant documents, tools, evidence and other helpful resources available in other specialised websites and HIA portals.

The site was launched last December 2011. It is an ongoing project and its full functionality will evolve throughout this year accordingly to new developments and emerging needs.

It has been created and it is maintained by the Andalusian School of Public Health. Nonetheless, we're planning to build on partnerships and collaboration with other public health institutions at the regional/national level, as well as with the private sector, as part of a wider strategy to promote HIA development and practice across Spain. The idea is to make it also a useful resource in other Spanish speaking countries interested in HIA.

Final Conference of the AIR Project

19th April 2012, Hotel Helia, Budapest, Hungary.

The best practices and recommendations to reduce health inequalities in primary care setting in the European regions

The AIR partners have worked on identifying practices and policies developed to reduce inequalities in primary care settings at regional level in Europe. After identifying and analyzing these practices, the AIR team is proposing recommendations to decision makers and health professionals.

The project began by a systematic review of academic. Then two questionnaires have identified actions which contribute to reduce health inequalities through primary care settings in the regions of the E.U and the specific population targeted in these actions. Finally the interventions have been selected and analysed. The high standard interventions that have met the evaluation criteria have been scrutinized to identify the "key factors" of success. A catalogue of good practices has been developed and recommendations will be disseminated to the policy makers and health professionals. The purpose of the AIR final conference is to present the results of the project and examples of interventions, taking into account their efficiency, cost and target population. This conference will also be an opportunity to discuss the means to reduce health inequalities in Europe as well as to debate the role primary care could play in the reducing of health inequalities. We hope that decision makers in the field of health, health care and social policy will attend, as well as representatives from national and regional organisations concerned by the issues of health inequalities in primary care.

Survey of National Public Health Associations experience of influencing national public health policy and practice in their country

The Public Health Association of South Africa (PHASA) is in the process of formulating strategies on engaging more effectively in health policy issues and influencing our national health authorities. We would like to canvass your ideas on how you have been able to engage with government as an independent national Public Health Association.

PHASA has been in operation for 10 years. Our successes include holding an annual conference, being relatively financially viable, and having a regular newsletter and webpage (<http://www.phasa.org.za>). We feel we should be influencing public health policy nationally but we have not had the resources or capacity to do so effectively.

We have also proposed a Satellite Session at the 2012 World Federation of Public Health Associations (WFPHA) Meeting entitled: "Increasing policy influence and engagement of national public health associations in Africa: Progress and challenges"

Your responses to questions would make this session much more exciting and useful for those attending.

Please complete this survey by **11 March 2012** by clicking on the following link:

https://www.surveymonkey.com/s/PHASA_Policy

5. EUPHA member updates

UK Society of Social Medicine <http://www.socsocmed.org.uk/>

Call for abstracts: SSM Annual Scientific Meeting, London 2012

Deadline: 19th March 2012, 23.59 GMT.

The Society for Social Medicine's 56th Annual Scientific Meeting (ASM) will be held in London from Wednesday lunchtime 12th September until Friday lunchtime 14th September 2012, jointly hosted by LSHTM and UCL.

The Society welcomes abstracts on all aspects of social medicine, including health services research, epidemiology, public health, statistics, sociology, psychology, health policy and/or mixed methods research.

Abstracts can only be submitted via the conference website at www.ssmconference.org.uk/.

The word limit is 400 words and the abstract should follow the format specified.

6. Upcoming courses and conferences

Going International (GI) promotes training and further education for experts and newcomers in public health and humanitarian assistance around the globe. The flagship of GI is the international course catalogue "medicine & health", a unique annual publication listing courses and congresses in the fields of biomedicine, public health and development cooperation. For further information: <http://www.going-international.at/index.php?lang=EN> Global International is an official partner of EUPHA.

Title **Conference: Towards a global health policy?
Celebrating 25 years of health policy research and teaching at the LSE**
Date 19-20 March 2012
Place London, UK
Organiser London School of Economics and Political Science
More information <http://bit.ly/zapCqV>

Title **Applied Bayesian Statistics in Medical Research and Health-Care Evaluation**
Date 26 - 28 March 2012
Place University of Bern, Institute of Social and Preventive Medicine (ISPM), Switzerland
Organiser SSPH + PhD Program in Public Health

Rapid risk assessment: Human fatality from highly pathogenic avian influenza A(H5N1) virus infection in Guangdong province, China

Date of publication: 5 January 2012

Following reports of a human fatality due to highly pathogenic avian influenza A(H5N1) virus infection in China's Guangdong province, the European Commission requested an update to the assessment of risk of human-to-human transmission occurring. ECDC does not consider that there is any change to the previous assessments that the risk for EU/EEA countries is very low.

Joint ECDC and EMCDDA rapid risk assessment: HIV in injecting drug users in the EU/EEA, following a reported increase of cases in Greece and Romania

Date of publication: 12 January 2012

In response to a notified increase in HIV cases among injecting drug users (IDU) in Greece and Romania, the European Commission asked the European Centre for Disease Prevention and Control (ECDC) and the European Monitoring Centre for Drugs and Drug Addiction (EMCDDA) in November 2011 to conduct a rapid inquiry among their network of HIV surveillance- and drug focal points to investigate whether such increases had occurred in other countries.

Surveillance reports European Monthly Measles Monitoring

Date of publication: 16 January 2012

ECDC monitors measles transmission in the EU and EEA/EFTA countries and produces monthly epidemiological updates. These European Monthly Measles Monitoring (EMMO) reports are based on information from multiple sources including national websites, the EUVAC.NET database, the Early Warning and Response System (EWRS), validated media reports, and personal communication from national authorities.

Weekly Influenza Surveillance Overview

Date of publication: every Friday

The weekly influenza surveillance overview is a collection of timely and relevant information regarding influenza activity in Europe. It provides key statistical data on a variety of issues including the following: sentinel surveillance of influenza like illness (ILI) and acute respiratory illness (ARI); virological surveillance; aggregate numbers of pandemic H1N1 2009; hospital surveillance of severe acute respiratory infection (SARI); mortality surveillance; and qualitative reporting.

Environmental health inequalities in Europe Assessment report

The WHO Regional Office for Europe has carried out a baseline assessment of the magnitude of environmental health inequality in the European Region based on a core set of 14 inequality indicators. The main findings indicate that socioeconomic and demographic inequalities in risk exposure are present in all countries, though they vary from country to country. The report reviews inequalities related to housing, injuries, and the environment, identifies gaps in evidence that still need to be filled, and suggests priority action to be taken at both the subregional and the national level, bearing in mind those national variations.

Guidance on water supply and sanitation in extreme weather events

(Edited by L. Sinisi and R. Aertgeerts)

Extreme weather events, including floods and droughts, are increasing in frequency and intensity. They affect the operation of water-supply, drainage and sewerage infrastructure, and the functioning of wastewater treatment plants, thereby affecting the protection of public health. Parties to the Protocol on Water and Health reviewed experience and good practice in Europe through a broad consultative process, to devise the present guidance.

This publication describes how adaptation policies should consider the new risks from extreme weather events, how vulnerabilities can be identified and which management procedures can be applied to ensure sustained protection of health. It takes an integrated environment-and-health approach and addresses cross-cutting issues, such as the role of the health and environment sectors in extreme weather, the need for policy dialogue and multisectoral partnership to assess and control risks, and the challenges of different settings (such as urban and rural, small and centralized large-scale supplies).

The publication is aimed at a broad audience, including policy-makers; environment, health and water-resources professionals; and water service managers.

For more information about the book, how to order and a link to the electronic version check:

NEW PUBLICATIONS ISSUED BY WHO – JANUARY 2012

We are pleased to provide you with the list of WHO information products recently released. Please click on [Just published](#)

You can also consult our information products catalogues in pdf format or select a subject catalogue from our e-commerce web site: [WHO Catalogues](#)

Please note that our new [Autumn 2011 Catalogue of WHO Information Products](#) is now available online.

[International Statistical Classification of Diseases and Health Related Problems \(The\) ICD-10. 2010 Edition](#)

This new edition of WHO's International Classification of Diseases, 10th Revision (ICD-10) has been fully updated for the third time. Originally published in the early 1990s, ICD-10 now incorporates all edits and updates since 1996 up to end of 2010. In addition, the numbering system has changed and now clearly indicates the year that the updates were incorporated.

[Safety and Security on the Internet](#)

This publication explores how the Internet has moved beyond an educational and research tool that once served as a social network for a few elite scientists and has been transformed into a commerce and health care juggernaut now accessible to much of the planet.

[Enterohaemorrhagic Escherichia coli in Raw Beef and Beef Products](#)

This volume and others in this Microbiological Risk Assessment Series contain information that is useful to both

risk assessors and risk managers.

[Guidelines on Optimal Feeding of Low Birth Weight Infants in Low- and Middle-income Countries](#)

The objective of these guidelines is to improve the quality of care received by LBW infants in developing countries through improved capacity of health workers.

[Handbook for Inspection of Ships and Issuance of Ship Sanitation Certificates](#)

This handbook is intended to be used as reference material for port health officers, regulators, ship operators and other competent authorities in charge of implementing the IHR (2005) at ports and on ships

[Human Rights and Gender Equality in Health Sector Strategies](#)

The specific objectives of the tool are to assess the extent to which health sector strategies are consistent with, and promote, human rights standards and principles, including gender equality.

[Housing: Shared Interests in Health and Development](#)

The target audience for this series is public health officers, who are not experts on determinants of health, but who have responsibilities for dealing with a broad range of development issues and partners.

[Education: Shared Interests in Health and Development](#)

The target audience for this series is public health officers, who are not experts on determinants of health, but who have responsibilities for dealing with a broad range of development issues and partners.

[Transport \(Road transport\): Shared Interests in Health and Development](#)

The target audience for this series is public health officers, who are not experts on determinants of health, but who have responsibilities for dealing with a broad range of development issues and partners.

[WHO Expert Committee on Biological Standardization, 57th report](#)

This report presents the recommendations of a WHO Expert Committee commissioned to coordinate activities leading to the adoption of international recommendations to assure the quality, safety and efficacy of vaccines, blood products and other biological medicines, and the establishment of international biological reference standards.

[WHO Expert Committee on Biological Standardization, 58th report](#)

This report presents the recommendations of a WHO Expert Committee commissioned to coordinate activities leading to the adoption of international recommendations to assure the quality, safety and efficacy of vaccines, blood products and other biological medicines, and the establishment of international biological reference standards.

[Effectiveness of Tax and Price Policies for Tobacco Control](#)

This new volume of the IARC Handbooks of Cancer Prevention in Tobacco Control presents a critical review and evaluation of the evidence by 25 international experts from twelve countries on the economics, epidemiology, public policy and tobacco control aspects of tax and price policies.

[Bulletin of the World Health Organization, Vol. 90, No. 01, 2012](#)

As the flagship periodical of WHO, the Bulletin is a leading international voice on public health issues. This peer-reviewed monthly draws on the expertise within WHO to provide a vital resource for those interested in research, policy issues and debate on international public health, particularly the problems confronting developing countries.

[Revista Panamericana de Salud Pública/Pan American Journal of Public Health](#)

The Revista Panamericana de Salud Pública/Pan American Journal of Public Health (RPSP/PAJPH) is an open-access, peer-reviewed monthly journal, published as the flagship scientific and technical periodical publication by the Pan American Health Organization (PAHO), headquartered in Washington, D.C., the United States of America. Its mission is to serve as an important vehicle for disseminating scientific public health information of international significance, mainly in areas related to PAHO's essential mission to strengthen national and local health systems and improve the health of the peoples of the Americas.

[Eastern Mediterranean Health Journal, Vol. 17 No.11, 2011](#)

The EMHJ was launched in 1995 as a peer-reviewed medical journal. Starting January 2010, the Journal has been given a new format and is now published monthly. The EMHJ serves as a forum for the dissemination of biomedical information through the publication of scientific research papers on a range of topics related to public health, with particular relevance to the Eastern Mediterranean Region.

BOOKS IN FRENCH

[Lutte contre les leishmanioses](#)

Ce rapport fait des recommandations concernant de nouveaux schémas thérapeutiques contre les leishmanioses viscérale et cutanée, l'utilisation de tests de diagnostic rapide, la prise en charge détaillée de la co-infection

leishmaniose-VIH et la prise en considération de facteurs sociaux et liés aux changements climatiques en tant que facteurs de risque de propagation accrue.

NEW PUBLICATIONS ISSUED BY WHO – FEBRUARY 2012

We are pleased to provide you with the list of WHO information products recently released. Please click on [Just published](#)

You can also consult our information products catalogues in pdf format or select a subject catalogue from our e-commerce web site: [WHO Catalogues](#)

Please note that our new [Autumn 2011 Catalogue of WHO Information Products](#) is now available online.

[International Nonproprietary Names \(INN\) for Pharmaceutical Substances CD-ROM](#)

This CD-ROM lists all International Nonproprietary Names (INN) in Latin, English, French, Spanish, Arabic, Chinese and Russian published up to November 2011, together with references to the lists of proposed and recommended INN in which they have been published.

[Bugs, Drugs & Smoke](#)

This book is primarily for young people, especially those interested in working in public health. It explains in simple, non-technical language how humankind developed techniques to protect the health of communities, drawing on first-hand interviews with leading public health figures.

[Toxicological and Health Aspects of Bisphenol A](#)

In light of uncertainties about the possibility of adverse human health effects at low doses of BPA, especially on reproduction, the nervous system and behavioural development, and considering the relatively higher exposure of very young children compared with adults, the Food and Agriculture Organization of the United Nations (FAO) and the World Health Organization (WHO) jointly organized an Expert Meeting to assess the safety of BPA.

[IARC Biennial Report 2010-2011](#)

A wide range of projects are described in the latest Biennial Report of the International Agency for Research on Cancer (IARC).

[Management of Sexually Transmitted Infections](#)

These new regional guidelines for STI management take into consideration the new technologies and therapeutics that are now available.

[Guide to Clinical Management and Public Health Response for Hand, Foot and Mouth disease \(HFMD\) \(A\)](#)

This publication provides practical support for the treatment, prevention and control of HFMD based on the most recent scientific literature and the current understanding and experiences of international experts.

[Regional Strategy to Stop Tuberculosis in the Western Pacific Region 2011- 2015](#)

This new Strategy builds upon the previous two regional strategic plans and introduces new, evidence-based interventions and technologies in response to the new and emerging challenges.

[Tuberculosis Control in the Western Pacific Region - 2010 Report](#)

This report presents data on multidrug resistant-TB from various drug resistance surveys from the countries and areas in the Region.

[Strategy to Halt and Reverse the HIV Epidemic among People who Inject Drugs in Asia and the Pacific 2010-2015 \(A\)](#)

This document is a call to action and a road map to ensure that the HIV and hepatitis epidemics among people who use drugs and their sexual partners in the Asia Pacific region will be halted

[Planning for the Health Sector Response to HIV/AIDS](#)

This set of training modules on Planning for the Health Sector Response to HIV/AIDS are intended to assist member countries of WHO to more effectively take up their responsibilities for their national health sector strategic planning.

[Bulletin of the World Health Organization, Vol. 90, No. 02, 2012](#)

As the flagship periodical of WHO, the Bulletin is a leading international voice on public health issues. This peer-reviewed monthly draws on the expertise within WHO to provide a vital resource for those interested in research, policy issues and debate on international public health, particularly the problems confronting developing countries.

[WHO Drug Information, Vol. 25, No. 4, 2011](#)

WHO Drug Information communicates pharmaceutical information that is either developed and issued by WHO or transmitted to WHO by research and regulatory agencies throughout the World. The journal also includes regular presentations of newly proposed and recommended International Nonproprietary Names (INN) for Pharmaceuticals Substances. This volume contains the proposed INN List no. 106.

[Revista Panamericana de Salud Pública/Pan American Journal of Public Health](#)

The Revista Panamericana de Salud Pública/Pan American Journal of Public Health (RPSP/PAJPH) is an open-access, peer-reviewed monthly journal, published as the flagship scientific and technical periodical publication by the Pan American Health Organization (PAHO), headquartered in Washington, D.C., the United States of America. Its mission is to serve as an important vehicle for disseminating scientific public health information of international significance, mainly in areas related to PAHO's essential mission to strengthen national and local health systems and improve the health of the peoples of the Americas.

[Eastern Mediterranean Health Journal, Vol. 17 No.12, 2011](#)

The EMHJ was launched in 1995 as a peer-reviewed medical journal. Starting January 2010, the Journal has been given a new format and is now published monthly. The EMHJ serves as a forum for the dissemination of biomedical information through the publication of scientific research papers on a range of topics related to public health, with particular relevance to the Eastern Mediterranean Region.
